(continued on page 4)

First 4 Championship Games Begin With 50+ Divisions

25+ Central Long Island Twins base runner, **Luis Quintero** scores the winning run just a head of the tag by Albuquerque Sox catcher, **Kristen Sifuentes** at Tempe Diablo yesterday.

Excessive High Temperatures Causing Some Over Heating Issues

Dehydration Symptoms Hard To Detect And Can Cause Serious Health Problems

By Tom Prendergast

Dehydration is a condition that can occur when the loss of body fluids, mostly water, exceeds the amount that is taken in. With dehydration, more water is moving out of individual cells and then out of the body than the amount of water that is taken in through drinking. Examples include heat, excessive activity, insufficient fluid consumption, excessive sweating, or medication side effects. Exactly the kind of things that take place during our games. Needless to say it's important to continue consuming fluids throughout the entire game. Symptom's include; dry mouth, feeling drowsy, decreased urine output, headache, dry skin or dizziness. Water or Gatorade are certainly good choices and are readily available at most of the facilities that we are using. If you feel one or more of these symptoms coming on make sure you alert one of your teammates immediately.
